SKILLS

- **Programming Languages:** Java, C, C++, JavaScript
- **Core CS Fundamentals:** Data Structures and Algorithms, OOP, DBMS, Operating Systems, SDLC
- **Databases:** SQL, MySQL, MongoDB
- **Data Science and Machine Learning:** Data Preprocessing, EDA, Feature Engineering, Model Evaluation
- **System Design Fundamentals:** Client-Server Architecture, REST API Design, Database Schema Design
- **Web Technologies:** React, Node.js, Express.js
- **Tools:** Git, GitHub, Postman, VS Code

TRAINING

W3grads

Jun 2025 - Jul 2025

Software Developer Summer Training (Full-Stack | MERN)

- Completed structured training in full-stack with a focus on backend services and API-driven applications.
- Developed full-stack MERN application implementing authentication, REST APIs, and MongoDB schema design.
- Gained hands-on experience with database schema design, authentication workflows, API integration, and basic debugging during development and testing.

PROJECTS

- **Movie Recommender System (Content-Based)** | Python, Pandas, scikit-learn, Heroku | [GitHub](#) Nov 2025 - Dec 2025
 - Engineered a content-based recommendation system using TF-IDF and cosine similarity on 5,000+ movies, achieving accurate personalized suggestions.
 - Performed data cleaning, exploratory analysis (EDA), and feature preparation to transform movie attributes into model-ready inputs.
 - Computed similarity scores between movies to generate personalized recommendations and deployed the application on Heroku for live demonstration.
- **Hotel Booking Platform** | React, Node.js, Express.js, MongoDB, Clerk | [GitHub](#) Aug 2025 - Sep 2025
 - Created a full-stack hotel booking application with separate interfaces for customers and hotel owners.
 - Implemented CRUD operations, authentication, and role-based dashboards to manage bookings.
 - Designed RESTful APIs to manage bookings, users, and hotel listings efficiently.
- **URL Shortener Application** | React, Supabase, Tailwind CSS, Shadcn UI | [GitHub](#) Jul 2024 - Aug 2024
 - Built a full-stack URL shortening application to convert long URLs into short, shareable links.
 - Implemented backend logic using Supabase for storing URLs and handling redirection efficiently.
 - Crafted a responsive and user-friendly interface using React, Tailwind CSS, and Shadcn UI.

CERTIFICATES

- Data Structures and Algorithms (DSA) using C++ | [Udemy](#) Sep 2025 - Oct 2025
- Full-Stack (MERN) with Generative AI | [W3grads](#) Jun 2025 - Jul 2025
- C++ Programming Beginner to Advance | [Udemy](#) Jan 2024 - Feb 2024

ACHIEVEMENTS

- Applied data preprocessing, exploratory data analysis (EDA), and machine learning techniques across multiple academic and personal projects.
- Worked with core data structures in Java including arrays, linked lists, stacks, queues, and trees for algorithmic problem-solving.
- Solved 200+ Data Structures and Algorithms problems across platforms such as LeetCode and GeeksforGeeks.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering Aug 2023 - Present
